JANUARY 2022

## **Re: Your request made under the Freedom of Information Act 2000**

We request sight of information potentially held by you, under the Freedom of Information Act 2000.

In December 2009, NHS FASP published the 'Ultrasound Survey of England 2008: Mapping of 1<sup>st</sup> and 2<sup>nd</sup> trimester fetal screening services in the NHS.' This survey states that a questionnaire was sent by post to all NHS Trust obstetric ultrasound units within the ten SHAs in the nine English regions, in January 2009. The survey confirmed that 156 useable questionnaires were returned out of 193 distributed.

We request confirmation as to whether responses were sent by Doncaster Royal Infirmary and Montagu Hospitals, within the Doncaster and Bassetlaw Teaching Hospitals NHS Foundation Trust. If these responses were sent, and copies retained by yourselves, please provide us with copies. Alternatively, if copies were not retained, please provide us with the Trust's detection rate data for serious cardiac defects in antenatal screening, for the years 2006 to 2010.

**We are unable to provide the information requested as we have no records of the 2008/2009 ultrasound fetal screening survey. We do not have any data recording serious cardiac defects detected by ultrasound during the period identified.**
